

TreatMePlease.com

Overview:

This platform will help psychotherapist and their patients get the most out of their journey together to solve lives difficulties, and learn helpful coping skills by providing professional tools like:

1. Open and convenient communication.
2. Session summaries for both, therapist and patient.
3. Tools for therapist to easily build treatment plan.
4. Diary for patient to journal over his feelings, and share with therapist.
5. Patient Profile to make it simple for therapist to get a good grasp of patient's life and his diagnoses.
6. Session Scheduling with calendar.
7. Homework Inbox for patient to get homework and working material from therapist.
8. Session Preparation for patient to remember topics to speak over with therapist on oncoming session.
9. And much more...
